STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BURNS:

S. 1909. A bill to improve the provision of telehealth services under the Medicare Program, to provide grants for the development of telehealth networks, and for other purposes; to the Committee on Finance.

Mr. BURNS. Mr. President, I rise today to talk about the introduction of my bill, the Medicare Telehealth Enhancement Act of 2005.

Now, not all of us live in the big city—like New York City or Chicago—but that should not mean that all of us cannot receive the same quality health care. Since I have been in office, I have spent a lot of time making sure that folks who live out in the hinterland—like the small towns of Scobey or Jordan or Wolf Point across Montana—still get quality health care, like everyone else. I do not want distance to be a barrier to care.

One of the ways we have bridged these divides is through telehealth—actually using technology to draw people together and deliver care. Now, across the great State of Montana, we have doctors consulting with patients who may be 200 or 300 miles away. That means those folks who live in the middle of nowhere do not have to drive 400 miles roundtrip, just to get a medical opinion on symptoms they may have or minor changes which may need to be made to their diabetes equipment, or feedback from an x-ray at a local clinic, from a specialist. That is a big deal, especially when roads are icy and the temperature is below zero.

I have sponsored the Medicare Telehealth Enhancement Act of 2005, which is a bill to improve the provisions of telehealth services under the Medicare Program and provide grants for the development of telehealth networks.

Specifically, my bill will: facilitate the provision of telehealth services across State lines, Licensure, as it affects providers who consult diagnose across State lines, remains a significant barrier to accessing such services, and call for Medicare reimbursement for remote medical and health services for all remaining institutions eligible to participate in Medicare but not currently eligible to be reimbursed for telemedicine/telehealth services.

Include an expansion of Medicare-covered originating telehealth sites, prioritizing eligibility for nursing homes, dialysis centers, and community-based mental health centers.

Revise “originating site” language to ensure telehealth service providers are reimbursement-eligible when patients are located at sites with telehealth capabilities, regardless of originating site designation.

Expand Medicare reimbursement for telehealth services to all geographical areas, recognizing eligibility for telehealth sites among urban populations as well as rural and underserved populations.

Allow for “eligible practitioners” furnishing telehealth services to include physical and occupational therapists, speech-language pathologists, and other certified providers, as well as those the Secretary of Health and Human Services approves.

Amend Medicare coverage to all remaining medical services currently covered under the CPT procedure codes but not eligible to be reimbursed when provided via telemedicine/telehealth, and medical services that are provided using store-and-forward technology.

Authorize a grant program through the Office for the Advancement of Telehealth of HRSA for the development of telehealth networks and defines non-profit and for-profit alliances as grant-eligible provided the grant recipient is a nonprofit.

Reauthorize the Telehealth Network and Telehealth Resource Centers grant programs through 2012.

Shortages of health care workers across the spectrum are nothing new.
